DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 14, filed August 17, 2004, with respect to claims 1, 15-16, 19 and 28 have been fully considered and are persuasive. The rejection of claims 1, 15-16, 19 and 28 has been withdrawn.

Allowable Subject Matter

2. Claims 1, 15-16, 19 and 28 allowed.

3. The following is an examiner's statement of reasons for allowance: A method for reducing multi-cell signal interferences in a wireless communication network, the method comprising: dividing an available frequency spectrum into a plurality of channels; segregating a first wireless communication coverage unit into a first number of geographical segments; grouping the channels into a second number of channel blocks; assigning each channel block to at least one of the segregated geographical segments with predetermined priorities; and repeating the above steps for each neighboring wireless communication coverage unit of the first wireless communication coverage unit, wherein the channels in different channel blocks exhibit no higher mutual interference than the channels in the same channel block, and wherein the channel block assigned for each segregated segment of the first wireless communication coverage unit is different from the channel block assigned for the segregated segment of a second wireless communication coverage unit that immediately borders with the segregated segment of the first wireless coverage unit even if the first and second wireless communication coverage units share the same frequency spectrum, wherein a

location of a wireless terminal entering the first wireless communication coverage unit is detected by utilizing one or more segregated access code channels (ACCS) for the segregated geographical segments of the first wireless communication coverage unit to identify the wireless terminal wherein the access code channels (ACCS) and the segments bear a one to one relationship..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Jonsson U.S. Patent US005513246A discloses a radiotelephone locating using alternative criteria.
- b. Tanaka U.S. Patent US006671509B1 discloses detecting mobile communication units in an area.
